Benefits of a Pre-Owned Vehicle

Does the idea of a used car automatically bring to mind the thought of an old rusted clunker? It shouldn't – not anymore. With more and more Americans buying and leasing new vehicles and trading them in only after a few short years of use, the market is being flooded with high quality pre-owned vehicles. This is great news for consumers who are in the market for a vehicle and concerned about their budget.

However, you might be saying to yourself, "I love that new car smell." Well, that smell of 'new' also comes with a hefty price tag. Consider this: a new vehicle depreciates in value as soon as it drives off the lot. You can expect to lose up to 15 percent of the car's value within the first year, according to bankrate.com.

When you buy from AutoLand, you know you're getting a quality pre-owned vehicle that has passed a rigorous inspection. AutoLand offers a 5 month/5,000 mile limited powertrain

warranty in addition to a 5 day/500 mile "no questions asked" return policy on its pre-owned vehicles. What's more, with a pre-owned you are getting a reasonably newer

vehicle with low mileage and you don't have the steep loss in depreciation. You can thank the previous owner for paying the initial depreciation costs for you, stretching your auto budget further. Call us for more information on AutoLand's pre-owned vehicles.
